who we are

THE COMPANY

Infragist is a leading technology solutions company that stands at the forefront of innovation and digital transformation. As a visionary tech think tank, we are dedicated to redefining the landscape of technological innovations in the market.

We see ourselves as more than just a tech solutions provider and our services span across Bespoke Software Engineering, ERP Consulting and Systems Integration, UX/UI Design, and AI/ML Solutions.

With a global perspective and an insatiable passion for innovation, our team of seasoned professionals works tirelessly to co-create software that continuously pushes boundaries and challenges the status quo.

"

Our story is one of unwavering commitment to helping businesses unlock their full potential through cutting-edge technology. We understand that your success is our success.

Through meticulous attention to detail and a deep understanding of your business goals, we develop applications that not only drive efficiency but also elevate your brand, engage your customers, and fuel your growth.

MISSION

Our mission is to be a leading business and technology solutions company, providing innovative, high-quality tech solutions to customers across the globe. We aim to exceed customer expectations by delivering superior value through our creativity, expertise, commitment, and integrity.

Our goal is to establish long-term partnerships with clients by providing exceptional services, leveraging the latest technologies, and delivering solutions that improve their business outcomes.

VISION

Our vision is to be a globally recognized team of professionals that consistently delivers high-quality, innovative tech solutions. We aspire to be the go-to partner for businesses looking to leverage technology to improve their operations and customer experience.

Our goal is to be a trusted advisor to our clients, providing them with the strategic guidance and technical expertise they need to achieve their goals. We plan to achieve this by investing in our people, technology, and infrastructure to deliver superior solutions and services to our clients.

FROM THE CEO

Infragist was founded on the principle of innovative thinking and the belief that technology should serve as a catalyst for progress and growth. We have always believed in the transformative power of technology and its ability to create real-world impact. Our journey thus far has been nothing short of extraordinary, but the road ahead is even more exciting.

As we continue to forge ahead, our focus remains on the development and implementation of cutting-edge technology services across Metaverse, Cyber Security, Blockchain, Machine Learning, and AI Solutions. Our goal is to democratize access to these advanced technologies and make them accessible to everyone, regardless of their level of technical skill. We envision a future where these technologies are not just a privilege of a few but are ubiquitous and integral parts of our daily lives.

Our commitment to ethical AI and sustainability is unwavering. As we continue to innovate, we are mindful of the importance of ethical considerations and the impact on our environment. Our aim is to develop AI solutions that are not only powerful but also transparent, explainable, and environmentally friendly.

Looking ahead, we see immense potential in the realm of generative AI and augmented working. We believe these areas will redefine the way businesses operate and how individuals interact with technology. We are excited to be at the forefront of this revolution, creating solutions that are not only practical but also push the boundaries of what is possible.

Our clients and partners are at the heart of everything we do. Their success is our success, and we remain committed to delivering solutions that meet their unique needs and add value to their operations. We look forward to working closely with our clients, as we navigate this journey together.

Leon Prescott

Chief Executive Officer (CEO)

" **transformative power of technology and its ability to create real-world impact.**

MARKETING & CUSTOMERS

At Infragist, we operate in a fast-paced, global technology solutions market, providing services in **Web3, Cyber Security, Blockchain, ERP, MSP, AI/ML, Staff Augmentation**, along with **Turnkey Software Engineering, UI/UX, Branding and Business Consultancy** verticals.

We cater to a wide range of sectors such as Healthcare, Finance, Logistics, and Smart Living, offering bespoke solutions to our diverse clientele, and our portfolio is proof of our expertise across these various domains.
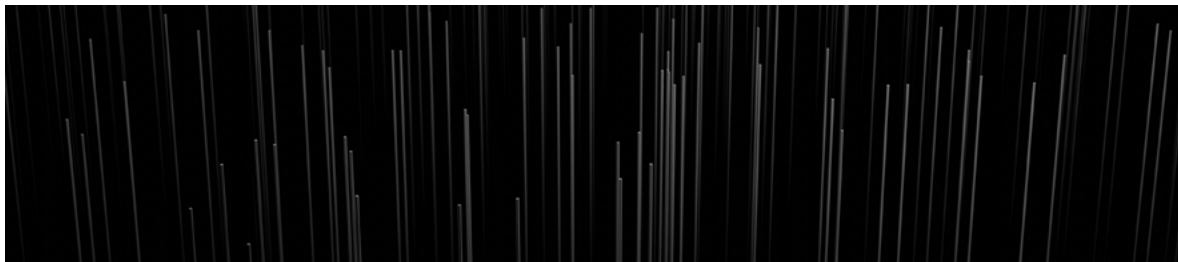

We have collaborated with Liwe Communities in the Smart Living sector to provide an all-encompassing, **Smart Community Management Tech Platform** that enhances the living and working experience in condominiums and gated communities. In Finance, we have successfully created robust and secure banking and/or insurance solutions for Amana Takaful and WEBXPAY. Our foray into logistics and delivery is marked by our fruitful collaboration with PortMatix and Sling Mobility. Our clients, primarily based in the UK, Australia, UAE, Switzerland and Sri Lanka, trust us for innovative tech solutions that drive their business growth.

We are proud to contribute to the democratization of AI, making this advanced technology accessible to a vast audience, irrespective of their technical proficiency. We have also made a commitment to ethical and sustainable AI, recognizing its increasing importance to customers and businesses globally. Our innovative solutions are tailored to the unique needs of our clients across sectors, thereby automating routine tasks, enhancing data security, and improving operational efficiency.

Our vision for the future involves expanding our reach and delivering our tech solutions to a wider global market. This expansion is a key part of our growth strategy as we plan to serve new industries and clients around the world. Our primary focus areas for expansion are the European Union, the Americas, Asia, and Australia, markets that exhibit high digital maturity, diverse industries, and a welcoming attitude towards the innovative tech solutions that Infragist offers.

To serve our global clients better, we plan to establish offices in key locations within these regions. This will enable us to offer localized solutions that cater to the unique needs of each market while also delivering exceptional service and support to our clients, regardless of their geographical location.

In the EU, we plan to harness the high digital adoption rates and the strong focus on data protection and ethical AI. The Americas present a dynamic market, abundant with industries ripe for digital transformation. The rapid digitalization and industrial growth in Asia make it a fertile ground for our solutions. As for Australia, its robust infrastructure and commitment to innovation make it an ideal market for our expansion.

By extending our reach globally, we aim to democratize access to cutting-edge tech solutions and bring the benefits of the varied verticals of service Infragist provides to companies and industries around the world. We acknowledge the unique set of challenges that comes with expanding to new markets, but we are excited about the opportunities that lie ahead. Our global expansion is not just about establishing a presence in new regions; it's about making a positive and lasting impact on industries and communities worldwide,and lasting impact on industries and communities worldwide.

making a positive and lasting impact on industries and communities worldwide.
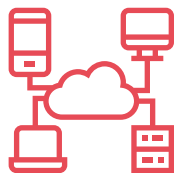

OUR SERVICES

BESPOKE SOFTWARE & SAAS

Representing the majority of our service portfolio, our custom software development offering is a testament to our innovative prowess. Our seasoned software engineers, architects, and designers collaboratively work with our clients to transform their unique ideas into robust, scalable, and efficient software solutions.

- We take a tailored approach to each project, beginning with a thorough understanding of the client's needs and objectives.
- This involves analysing their business processes, assessing the challenges, and identifying opportunities for digital enhancement.
- We then design and develop software that not only meets these requirements but also anticipates future needs, thanks to our forward-thinking approach.
- We specialize in building a wide range of software, including enterprise applications, mobile apps, web applications, and more.
- Whether you need a complex ERP system or an intuitive mobile app, our team has the expertise and creativity to deliver software that adds significant value to your business.
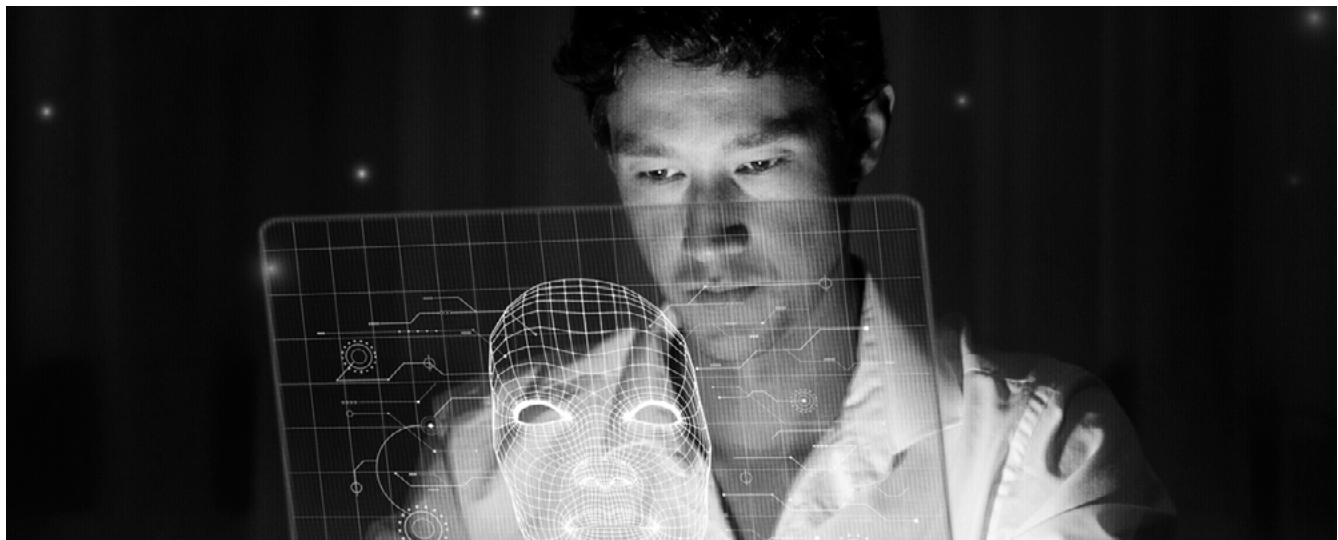

ERP & MSP IMPLEMENTATION

At Infragist, we are a trusted provider of comprehensive tech solutions, specializing in ERP (Enterprise Resource Planning) and MSP (Managed Service Provider) implementation. With our expertise and commitment to excellence, we help businesses streamline their operations, optimize efficiency, and drive sustainable growth.

- Our ERP implementation services are designed to transform your organization's processes by seamlessly integrating various departments and functions. We work closely with you to understand your unique requirements and tailor the ERP system to meet your specific business needs. From initial planning and configuration to data migration and training, our experienced team ensures a smooth and successful ERP implementation journey. By centralizing data, automating workflows, and providing real-time insights, we empower you to make informed decisions, enhance productivity, and achieve operational excellence.

- As a trusted MSP, we offer end-to-end managed services that encompass the proactive management and support of your organization's IT infrastructure and systems. Our team of skilled professionals takes care of your technology needs, from network monitoring and security to cloud services and help desk support. With our proactive approach, we minimize downtime, optimize system performance, and ensure a secure and reliable IT environment. By partnering with us as your MSP, you can focus on your core business objectives while we handle your technology needs with expertise and efficiency.

AI/ML, WEB3 & CYBERSECURITY

At Infragist, our commitment to excellence, deep technical expertise, and passion for innovation drive us to deliver transformative solutions. We collaborate closely with our clients, understanding their unique challenges and tailoring our services to meet their specific needs. Together, we navigate the evolving technological landscape, empowering businesses to thrive and succeed in the digital age

- In the realm of AI/ML (Artificial Intelligence/Machine Learning), we harness the power of advanced algorithms and data-driven insights to help businesses unlock the full potential of their data. From predictive analytics to intelligent automation, we develop tailored solutions that empower organizations to make smarter decisions, optimize operations, and achieve unprecedented efficiency.

- With our expertise in Web3 technologies, we enable businesses to embrace the decentralized and blockchain-powered future. We specialize in building decentralized applications (dApps), smart contracts, and blockchain solutions that enhance transparency, security, and trust in various industries. Through Web3, we help our clients revolutionize their operations and unlock new business opportunities in an increasingly digital and interconnected world.

- In today's fast-paced digital landscape, cybersecurity has become paramount. Our dedicated team of experts ensures the safety and integrity of our clients' digital assets. We offer comprehensive cybersecurity solutions, including vulnerability assessments, penetration testing, threat intelligence, and incident response. With our proactive approach, we safeguard businesses from ever-evolving cyber threats and provide them with the peace of mind they need to focus on their core objectives.

our services
STAFF AUGMENTATION

In the dynamic world of technology, having the right talent at the right time is crucial. At Infragist, we offer staff augmentation services designed to help you expand your technology team with top-tier talent. Our remote engineers provide high-quality work, seamlessly integrating into your existing teams as if they were physically present in your office.

Increasing Your Bandwidth When Needed

Infragist recognises the importance of onboarding qualified professionals during critical project phases. Our staff augmentation services are not just about filling gaps; they're about enhancing your existing capabilities and bringing fresh perspectives to your projects. With access to an extensive network of professional developers, we help you avoid costly hiring mistakes, streamline your recruitment process, and free up your time for more strategic endeavours. Our process is smooth, swift, and designed to get your project underway as quickly as possible.

Our Rigorous Screening Process

At Infragist, we believe in quality over quantity. We employ a stringent screening process that enables us to identify and onboard the top 1% of qualified individuals for staff augmentation. This rigorous process ensures that we provide you with highly skilled, experienced, and dedicated professionals who can hit the ground running and add immediate value to your projects.

Quality Assurance

Our Talent Experience Managers work actively to ensure a smooth and perfect partnership. They establish a continuous feedback loop between your company, the developer, and themselves. This proactive approach ensures that any issues are addressed promptly, and the developer remains motivated and aligned with your goals.

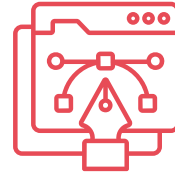

Mitigating Attrition

We understand the impact of attrition on project timelines and productivity. Our Talent Experience Managers coach each developer from the beginning, helping them define their professional goals and maintain motivation. This focus on personal development, combined with exciting project opportunities, helps us maintain high retention rates and ensure continuity for your projects.

Benefits of Staff Augmentation with Infragist

- **Quick Spin-Up, No Recruiting Cost:** We've handpicked the best talent from a diverse pool of professionals. Our efficient HR process allows us to quickly assemble teams who operate as your full-time employees, eliminating the need for you to invest time and resources in recruitment.

- **Employee Administration Simplified:** We handle the administrative aspects of employment, including contracts, payroll, vacations, and replacements. This allows you to focus on your core business while we take care of the rest.

- **Reduced Labor Costs:** Staff augmentation reduces overhead costs associated with maintaining full-time, in-house staff. It also makes paying year-round employees less expensive by contracting work for finite projects.

- **Flexible and Scalable:** Our staff augmentation services offer the flexibility to expand your team on demand with specialised talent for finite projects. This scalability allows you to adapt quickly to changing project requirements.

- **Time Zone Compatibility:** Our remote developers work in your time zone, promoting real-time collaboration and eliminating the need for you to adjust your work schedule.
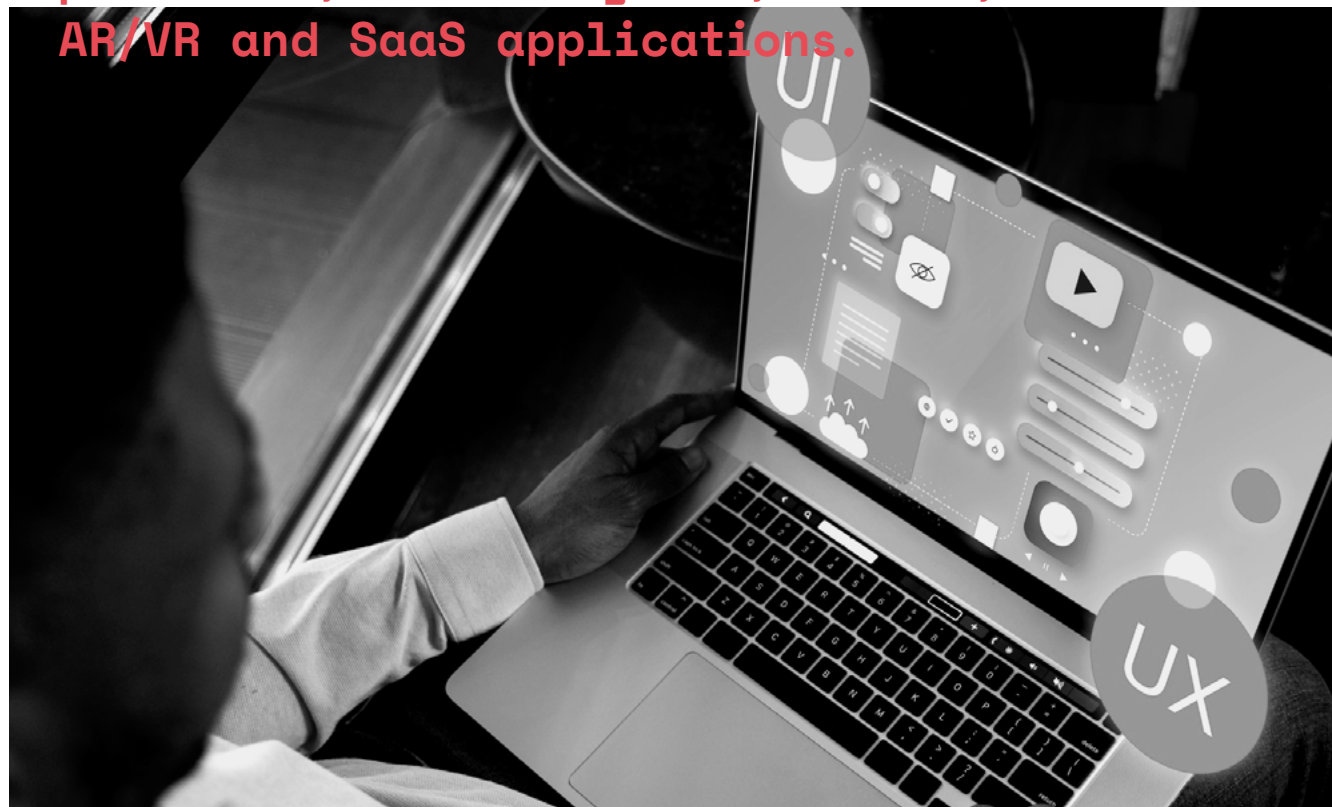

UI/UX DESIGN

At Infragist, we believe that an exceptional user experience can be a game-changer for businesses. That's why UX/UI design forms another significant part of our service portfolio. Our designers are experts in creating interfaces that are not only visually appealing but also intuitive and user-friendly.

- We take a user-centric approach to design, focusing on understanding user needs, behaviours, and motivations.
- Our design process involves user research, wireframing, prototyping, user testing, and iterative design to ensure that the final product meets the highest standards of usability and user satisfaction.
- Whether you need a simple, clean interface for a mobile app or a complex, feature-rich design for an enterprise system, we have the skills and creativity to exceed your expectations.

We design for a variety of platforms, including web, mobile, AR/VR and SaaS applications.

BRAND IDENTITY DESIGN

At Infragist, we understand the profound impact of a compelling brand in today's highly competitive business landscape. That's why we offer comprehensive branding services that align with your strategic vision and resonate with your target audience.

Our goal at Infragist is to create brands that inspire trust, drive customer loyalty, and propel businesses forward.

- Your brand is more than just a logo; it's the complete experience a customer has with your company, products, or services.We start the branding process by gaining a deep understanding of your business, your goals, and the unique value you bring to your customers.
- We then craft a brand strategy that effectively communicates this value.
- Our creative team excels at logo design, crafting unique logos that are not only aesthetically pleasing but also deeply representative of your business's essence.
- But our branding services go beyond visual elements; we work on your brand voice too, creating a distinct tone and style for all your communications that effectively convey your brand personality and values.We help you develop a compelling brand story, one that connects emotionally with your audience and sets you apart from your competitors. This story becomes the foundation of all your marketing efforts, driving engagement and customer loyalty.
- At Infragist, we know that a strong brand is consistently represented across all touchpoints. As such, we ensure your branding is effectively translated in your website design, social media presence, marketing collateral, product packaging, and even your customer service approach.
- Moreover, our branding services are not a one-time event. Brands must evolve with changing market dynamics and customer expectations. That's why we provide ongoing brand management, helping you maintain brand consistency, adjust to market changes, and keep your brand fresh and relevant.

PORTFOLIO OF WORK

Scribe on Time

An end-to-end ecosystem to connect medical professionals and their transcriptionists.

Scribe IT were faced with challenges in efficiently managing the transcription process while ensuring compliance with Australian data privacy laws. They needed a solution that would enable doctors to dictate their reports conveniently while seamlessly sharing the recordings with back-end teams located in various parts of the world.

The solution we created was an ecosystem which was a combination between a Secure Mobile Application that enables doctors to dictate reports conveniently and seamlessly share this via the system to their offshore teams for processing, eliminating the need for physical storage media or manual file transfers.

The entire processing workflow takes place within a Secure Web Platform, with all relevant patient data being stored on Onshore Data Centres and ensuring compliance with Australian data privacy laws by handling the entire lifecycle of the report within Australian jurisdiction itself. The finalized reports are then shared with the doctors right onto their mobile or web-accessible platform.

The software also provides extensive administrative options, empowering admins and managers to generate custom reports on staff productivity, as well as on the volumes of reports by clinic, doctor or a combination of the variables.

Staff are able to keep track of their day-to-day tasks using the software, which connects directly to their MS Office 365 Accounts, allowing for easy authentication and access.

Liwe Communities

Sri Lanka's first comprehensive cloud-based smart communities management tech platform.

Liwe Communities was founded during the COVID-19 Pandemic in 2020, initially as a solution to address the issues that the founders of the platform themselves found around the aspects of day-to-day living in a condominium or gated community.
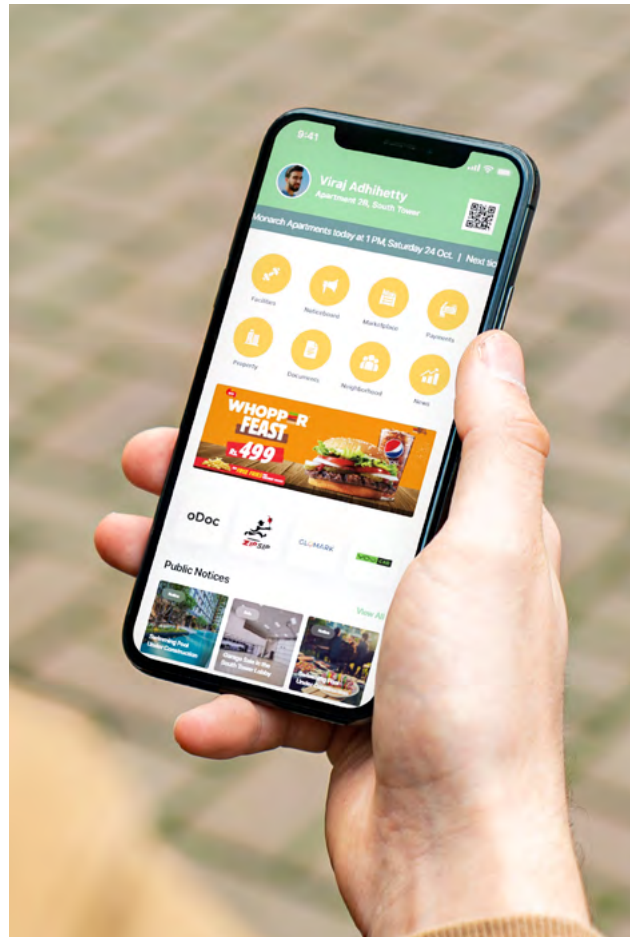

The platform's main goal is one of connectivity; between the residents and the management, as well as the greater community around their homes.

The solution we created was a simple, easy to use mobile application for the residents or tenants of the premises, where they were able to perform a multitude of day-to-day tasks at a press of a button.

The key features we introduced to the platform were in response to some of the most common issues we found during market research, and were integral parts of a household's daily tasks; namely, Inviting Visitors, Raising Support Requests, Booking or Reserving Facilities in the premises and Making Bill Payments for regular expenses such as utilities, rent or management fees.

The solution was built in such a way where we connected systems from key business partners, which allows Liwe to offer Grocery Purchasing, Medical Consultations & Telehealth Services, Mobility Services and even Food & Beverages as deep integrated services, giving Liwe users the seamless experience of having anything a household needs within the ecosystem.

Liwe is live in multiple condominiums in Sri Lanka, with expansion plans into Maldives & Dubai in place.

Sling Mobility

An EV Logistics solution for Last Mile Delivery, Fleet Management & Shared Mobility.

Sling Mobility is a sustainable, eco-friendly alternative to traditional mobility solutions, and the nature of the devices neccesitated a purpose-built solution to ensure a seamless customer experience.
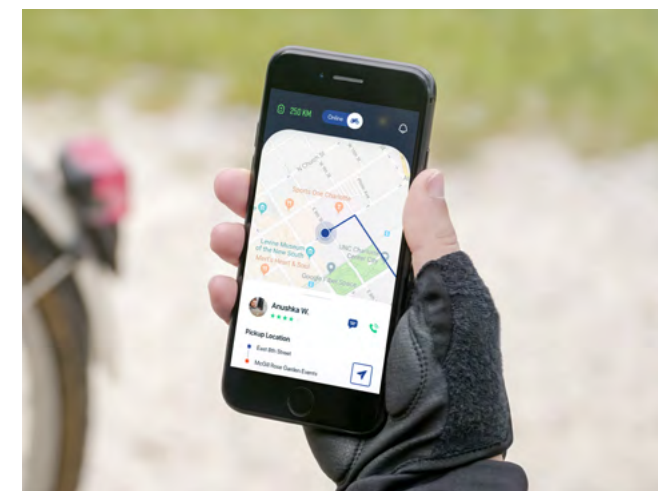

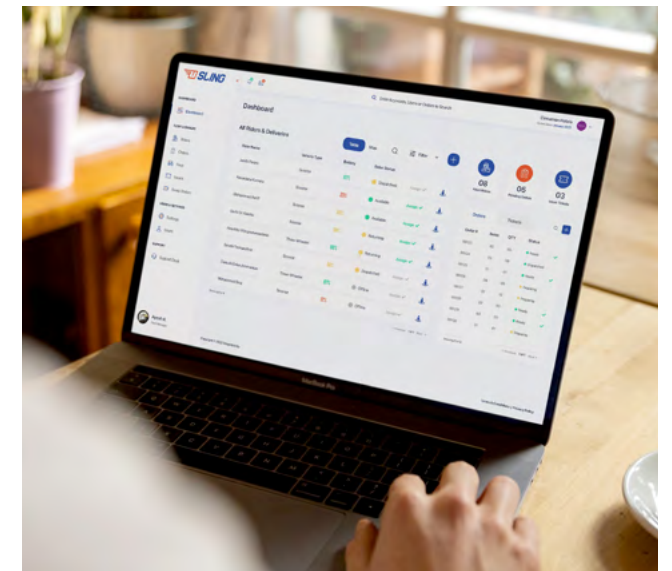

Sling also had 2 separate market segments it was catering to, which was direct to consumer as well as a Fleet Managment solution provider to businesses with last-mile logistics requirements.

The solution we engineered was an overall ecosystem between the End Users, Delivery Riders and Dispatch Centre, which was created as a modularized system that is scalable and could be segmented into separate instances based on customer requirements.

A key differentiator for Sling was that their devices were not rechargeable, but worked on a proprietary battery swapping architecture, allowing for minimal downtime for riders. This neccesitated the creation of the battery swap stations as well, including the solution architecture and the interfacing software for the self-replacement of the batteries.

For Individual Riders, the system calculates due amounts for the device lease as well as the battery swaps, for which payments are all collected automatically on the rider's card on the system.

The Shared Mobility services were another key aspect that we worked on for Sling. We were instrumental in the strategizing and conceptualizing of the working Shared Mobility business model, as well as the UX/UI and Engineering of the solution.

4 Amana Takaful Insurance

A simple and more efficient way to manage your insurance policies & premiums.

With the advent of many businesses embracing digital transformation, Amana Takaful Insurance was at the forefront of the movement with the digitization of the entire General Insurance workflow, from purchasing a new policy, changing existing policy details, renewing policies and even intimating and following the statuses of claims made by an individual or corporate user.

The solution we implemented was done in conjunction with multiple Business Unit Leads at Amana Takaful, with whom we re-engineered their existing workflow to fit an electronic KYC and completely digital process. Our joint efforts were instrumental in creating more streamlined, efficient workflows and methods of data collection, which makes the once tedious and complicated task of purchasing an insurance policy, just a matter of a few minutes in front of your PC or mobile.

In a revolutionary step, we are now in the process of creating a Life Insurance policy that can be purchased online, with this being crafted as a prototype product in a market segment where the verification of information is stringent.

The Amana Takaful Insurance application is an easy, self-service application suite for both individual and corporate users, giving users a detailed oversight of their insurance-related activities, as well as industry updates and other important news segments.

Infragist also assisted with the creation of the new Amana Takaful Insurance website, where the online purchase option is available to users on the web.

5 Easy English

An interactive English language decoding & teaching application for children.
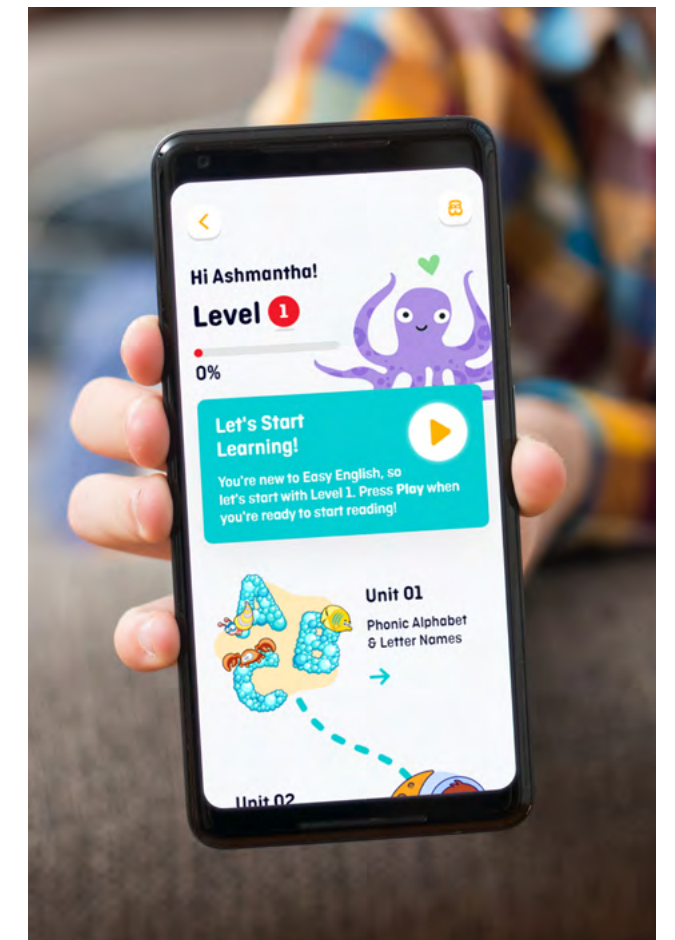

Easy English's origins were as a physical set of 5 books and an audio CD, when a career educator identified the massive gap in the market of Sri Lanka for the learning of English Phonics and the basics of decoding the language. This was an issue that was very much prevalent in the more rural or impoverished areas of the country, and so Easy English was conceptualized as an easy-to-access method of these learning materials as an application that was to be made freely available for use.

Engineering this solution was quite interesting, as we needed to ensure that the entire workflow was simple enough for a child between the ages of 5 and 11, with little to no English literacy skills to navigate and engage with, all the while ensuring that the child does not lose interest with the learning experience and is overly stimulated by elements on the screen.

Easy English achieves this by compounding the learning experience into localized stories that the users read and interact with on the platform. The testing/quizzing process has been gamified into a few simple quiz games a user has to complete at the end of each module on the platform.

The solution is created on a freemium model, where new users are given access to a singular module as a teaser, after which they would need to pay a subscription to access the full contents.

The system is also created so that once each module is unlocked, it would save an offline copy on your device, reducing the usage of mobile data or internet while the users travel or do not have access to the internet.

PORTMATIX

A smart workflow management solution for logistics operators, shipping lines, container warehousers & port authorities.

PortMatix started out as an easy solution for first-line empty container inspections, in response to eliminate the multitude of issues plaguing the drivers and other operators at ports around the globe. It is now evolving into a full suite of services that caters to many segements in the overall logistics workflow, including Trucking Companies, Clearing Agents, Truck Drivers, Shipping Lines and even Shippers and Consignees.

Current Process & Problems We Solve

PortMatix has various solutions for the lifecycle of an export container from the point of the empty container is released from Storage, through Demurrage, Detention and until it is back in Storage.

Why PortMatix?

The COVID-19 pandemic inspired ports and terminal operators all over the world to digitize most operations wherever relevant to have contact free transactions and implement technology to enhance overall efficiency and Logistics Performance index of the countries they operate in.
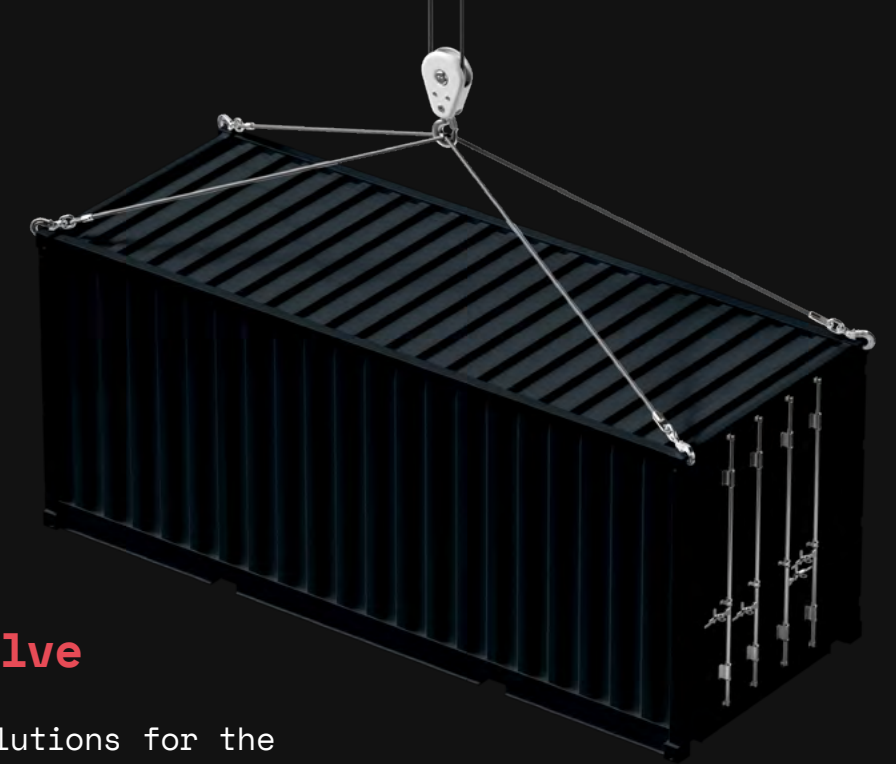

Over the years, logistics operators have been finding sustainable solutions to address these global issues such as the pandemic, climate change, volatile market segments and carry-on business; however, there still exists a gap in the market for 360° platform that allows for all stakeholders throughout the process to have clear insights and communication at any point in time.

It is to address these gaps in the market, the product PortMatix was conceptualized.

Transparency

We bring transparency to the forefront by providing real-time tracking and visibility of shipments at every stage of the supply chain. With instant updates on delivery status, location, and estimated arrival times, both businesses and customers can make informed decisions and gain peace of mind.

Accountability

PortMatix fosters a culture of accountability by capturing and storing detailed records of each transaction and operation. From shipment history to delivery confirmation, traceability ensures that all parties involved are accountable for their roles and actions throughout the logistics journey.

Scalability

Adapting to your business growth is seamless with our application's scalability. Whether you handle a few shipments or manage a large logistics network, our technology ensures your operations remain efficient and effective, accommodating your needs as you expand and evolve.

Efficiency

Experience heightened efficiency with real-time updates, a vast database of service vendors, minimal delays between shipments, and automated critical processes. By streamlining operations, we ensure faster order processing, reduced lead times, and increased productivity for your company.

Sustainability

With a strong commitment to sustainability, PortMatix is conscious about offering eco-friendly solutions. By digitizing operations, reducing empty miles, and promoting greener practices, we contribute to minimizing environmental impact and promoting a sustainable future for the logistics industry.

Convenience

PortMatix brings convenience to the forefront, allowing businesses to manage shipments, track deliveries, and access critical information at their fingertips. With an intuitive interface and easy-to-navigate features, logistics management becomes a hassle-free experience for all stakeholders involved.

LEADERSHIP

Leon Prescott

Chief Executive Officer

As the CEO of Infragist, Leon leverages his international accreditation as a Corporate Coach and extensive business acumen to drive the company's growth.

With a background in Psychology, an MBA from Cardiff Metropolitan University, and professional training from Asia's largest coach training centre, he brings a unique perspective to the corporate sector. His extensive travel and understanding of various cultures further enrich his leadership, fostering a diverse and innovative environment at Infragist.

Viraj Adhihetty

Chief Product Officer

Viraj is responsible for leading a team of talented designers and developers to create cutting-edge products that exceed our clients' expectations. With his industry experience, he has developed a deep understanding of future-proof design trends and technologies and his expertise lies in creating user-centric designs that not only look great but are also intuitive and easy to use.

Viraj is also passionate about finding innovative solutions to complex design problems, and works closely with the team to bring those ideas to life.

Az Da Rosa

Head of Business Development

Az has acquired nearly 2 decades of business development skill and strategy development across several continents and an array of industries.

His passion for technology and ability to develop teams and individuals that serve clients with a growth mindset has enabled him to support many businesses in generating new revenue streams, reducing operational costs and integrating tech solutions for scalability.

Uditha Sirimalwatta

Head of Enterprise Solutions

Uditha is a tech entrepreneur specializing in ERP and CRM solutions for multinationals and corporations the world over. With a keen understanding of business processes and a passion for innovative solutions, he empowers companies to optimize their operations and drive growth. His track record of delivering tailored tech solutions to diverse industries sets them apart as a leader in the field.

Through a relentless pursuit of excellence and cutting-edge technologies, He is dedicated to helping businesses thrive in the digital age.

FUTURE PLANS

Tech Advancement

Infragist is committed to keeping pace with the rapidly evolving tech landscape. Our current capabilities span across Metaverse, Cyber Security, Blockchain, Machine Learning, and AI Solutions, and we continually invest in our technological capacity to stay ahead of emerging trends and developments.

Following the current trends in Artificial Intelligence, we plan to focus on the democratization of AI, generative AI, ethical and explainable AI, augmented working, and sustainable AI in the coming years. We believe that these areas hold immense potential to transform how businesses operate and will position us to deliver even more value to our clients.

Global Expansion

Our vision for Infragist is to become a truly global technology services company. To achieve this, we plan to expand our presence in the EU, the Americas, Asia, and Australia. We aim to open offices in key locations within these regions, enabling us to provide localized tech solutions and exceptional support to our clients, regardless of their geographical location.

These new markets hold exciting opportunities for growth, and we are committed to understanding and adapting to the unique needs and challenges of each region. Our goal is to democratize access to tech solutions and help businesses worldwide harness the power of digital transformation.

Sustainable Practices

As a technology services company, we are conscious of our impact on the environment and are committed to implementing sustainable practices. We aim to adopt green energy-powered infrastructure where possible and leverage our AI capabilities to identify sources of waste and inefficiency, working towards more energy-efficient operations.

Moreover, we believe that technology should be used for good and therefore plan to deploy our AI initiatives to tackle some of the most pressing global issues, such as deforestation and illegal fishing activity.

As we move forward, we will stay true to our mission of being a catalyst for business transformation. We are excited about the journey ahead and are committed to delivering innovative and sustainable tech solutions that drive success for our clients around the world.
